From the Editor-In-Chief

With great joy and in a spirit of purpose, we release you the first issue of the International Journal of New Medicine. As an open access (OA) journal (Ashraf and Iqbal, 2019; Iqbal, 2022; Kandi, 2022), the International Journal of New Medicine will be published bi-annually. We aim to be a new idea generator and a catalyst for change in the field of medicine. In other words, we help research institutions.

The arrival of 21st-century medical science and technology is developing rapidly and has advanced like never before. With the incorporation of artificial intelligence in diagnostics plus transformative advances in regenerative medicine plus precision therapeutics, we are at the cutting edge of medical renaissance. But with all of these advancements come complications like ethical issues, equal access, and introduction of new treatments into different healthcare systems.

This journal seeks to connect ideas and actions. We want to promote working together between different subjects, encourage thinking and talking about things and take things from one subject to another. We welcome input from our global community of researchers, clinicians, policymakers, and industry leaders to redefine the limits of medicine for the good of mankind.

This first issue showcases a number of articles reflecting the innovative spirit. New, innovative contributions to the journal include researching artificial intelligence in drug discovery. Latest work on biomaterials for drug delivery, and much more.

We are all in this together, and medicine is about conversation and collaboration. We invite all readers to join in the conversation, ask questions you may have and share your thoughts with us on the future of the healthcare industry.

We thank the authors, reviewers, and editorial board members for their contributions which made this issue possible. Your dedication to better medicine is the reason for our success.

Together, let's create a tomorrow where technology and sympathy unite for the human good. We are absolutely delighted you are here.

CONFLICT OF INTEREST

Authors hereby declare that they have no conflict of interest.
